Question 1
                     Coders here is a simple task for you, you have given an array
Correct
                     of size N and an integer M.
Marked out of
1.00
                     Your task is to calculate the difference between maximum
₽ Flag
question
                     sum and minimum sum of N-M elements of the given array.
                     Constraints:
                     1<=t<=10
                     1<=n<=1000
                     1<=a[i]<=1000
                     Input:
                     First line contains an integer T denoting the number of
                     testcases.
                     First line of every testcase contains two integer {\it N} and {\it M}.
                     Next line contains {\it N} space separated integers denoting the
                     elements of array
                     Output:
                     For every test case print your answer in new line
                     SAMPLE INPUT
                     51
                     12345
                     SAMPLE OUTPUT
                     Explanation
                     M is 1 and N is 5 so you have to calculate maximum and
                     minimum sum using (5-1 =) 4 elements.
                     Maximum sum using the 4 elements would be
                     (2+3+4+5=)14.
                     Minimum sum using the 4 elements would be
                     (1+2+3+4=)10.
                     Difference will be 14-10=4.
                     Answer: (penalty regime: 0 %)
                          1 #include<stdio.h>
                              int main()
                          3 + {
                                    int t;
scanf("%d",&t);
                          4
                          5
                                    while(t--)
                          6
                          7 *
                                    {
                                         int n,m,d,min,temp;
scanf ("%d %d",&n,&m);
                          8
                          9
                         10
                                         d=n-m;
                                         d=n-m;
int arr[n];
for(int i=0;i<n;i++)
scanf ("%d",&arr[i]);
for(int j=0;j<n;j++)</pre>

Flag
question

A brilliant scientist has discovered a new strain of virus which can cure this disease. Vaccine produced from this virus has various strength depending on midichlorians count. A person is cured only if midichlorians count in vaccine batch is more than midichlorians count of person. A doctor receives a new set of report which contains

midichlorians count of each infected patient, Practo stores all vaccine doctor has and their midichlorians count. You need to determine if doctor can save all patients with the vaccines he has. The number of vaccines and patients are

First line contains the number of vaccines - N. Second line contains N integers, which are strength of vaccines. Third

Strength of vaccines and midichlorians count of patients fit

A new deadly virus has infected large population of a planet.

Input Format

equal.

.

line contains N integers, which are midichlorians count of patients.

**Output Format** 

Print a single line containing 'Yes' or 'No'.

1 < N < 10

in integer.

Question 4 Correct Marked out of 1.00 F Flag

question

Your task is to sort the array in non-decreasing order and print out the original indices of the new sorted array.

## Example:

A={4,5,3,7,1}

After sorting the new array becomes A={1,3,4,5,7}.

The required output should be "4 2 0 1 3"

### INPUT:

The next line consists of the array of size m

The first line of input consists of the size of the array

### OUTPUT:

Output consists of a single line of integers

CONSTRAINTS:

### 1<=m<=106 0<=A[i]<=106

NOTE: The indexing of the array starts with 0.

SAMPLE INPUT

5 45371

SAMPLE OUTPUT

42013

```
Answer: (penalty regime: 0 %)
      1 |#include <stdio.h>
2 int main ()
3 |
     1
                  int n;
scanf("%d",&n);
int arr[n];
      4
      5
      6
                  for(int i=0;i<n;i++)
scanf ("%d",&arr[i]);
int max=arr[0];
